How do I view my submission information and grade?

1. Go to the Quiz tool and click on the dropdown arrow next to the quiz you would like to see your submission view and grade for, then click Submissions.

2. This window will show you all of your attempts for the quiz along with your grade for each attempt and your overall grade. You will only see what your instructor has allowed; score, questions, correct answers, etc.

Note: Some professors set up the attempts so that you can see the questions you answered with your responses and the correct answer. To view this, simply click on the attempt you would like to view.
